

INDUSTRIAL SHIELDS by Boot & Work Corp, S.L.

Declaration of Conformity with the RoHS Directive

Directive 2011/65/EU (contained in Royal Decree 208/2005) restricts the use of 6 substances (see list below) in the manufacture of specific types of electrical equipment.

Although the restriction is not legally applicable to the components, it is recognized that the compliance of the same is relevant for many customers.

Definition of compliance with the RoHS directive:

- RoHS compliant means that the product does not contain any of the restricted substances in concentrations and applications prohibited by Directive Y (for components)
- The product is capable of being processed at the higher temperatures required for lead-free soldering compared to conventional soldering

The restricted substances and their maximum permitted concentrations in the homogeneous material are:

Substance	Concentration
PBB	0.1%
PBDE	0.1%
Cadmium	0.01%
Hexavalent chromium	0.1%
Lead	0.1%
Mercury	0.1%

Industrial Shields has contacted the product's supplier, being informed that the product is "According to the RoHS directive".

Industrial Shields has taken all the actions to confirm this statement.
