M-Duino 38R+
LoRa

Industrial Shields®
## Technical Features

### CONECTABLE PLC ARDUINO 24Vcc M-DUINO

#### MODEL TYPE
M-Duino LoRa

#### Input Voltage
12 to 24Vdc (Fuse protection (25A) Polarity protection)

#### Input rated voltage
24Vdc

#### Rated Power
30 W

#### I max.
15A

#### Size
101x94.7x119.5

#### Clock Speed
16MHz

#### Flash Memory
256KB of which 8KB used by bootloader

#### SRAM
8KB

#### EEPROM
4KB

#### Communications & Accessories
I2C, Ethernet, USB, RS485, RS232, SPI, LoRa, RTC, microSD

#### USB consideration
Only for uploading or debugging, NOT connected as a serial

### General Features

#### Power supply voltage
DC power supply

#### Operating voltage range
DC power supply

#### Power consumption
Power supply voltage

#### External power supply
Power supply voltage

#### Insulation resistance
20MO min at 500Vdc between the AC terminals and the protective earth terminal.

#### Dielectric strength
2,300 VAC at 50/60 Hz for one minute with a leakage current of 10mA max. Between all the external AC terminals and the protective ground terminal.

#### Shock resistance
80m/s² in the X, Y and Z direction 2 times each.

#### Ambient temperature (operating)
0° to 60°C

#### Ambient humidity (operating)
10% to 90% (no condensation)

#### Ambient environment (operating)
With no corrosive gas

#### Ambien temperature (storage)
-20° to 60°C

#### Power supply holding time
2ms min.

#### Weight
609g max.

## Inputs (x11)

### Analog/Digital Input 10bit
(0-10Vcc) - (x6)

#### Interrupt Isolated Input
HS (24Vcc) - (x3)

#### Expandability
I2C, 127 elements - ModbusRTU with RS485. 32 elements - LoRa

### Outputs (x22)

#### Analog Output 8bit (0-10Vcc) / PWM Isolated Output 8bit
(24Vcc) - (x6)

#### Digital Isolated Output Relay - (x16)

#### Pinout

Install Arduino IDE and the Industrial Shields boards

The steps to follow to install our equipment’s to Arduino IDE are:
- Open the Arduino IDE, versión 1.8.0 or superior. If you don’t have it yet, you can download here: https://www.arduino.cc/en/Main/Software.
- Press the “Preferences” option to “File” menu and open the preferences window.
- In the text box “Additional boards manager URLs”, add the direction: http://apps.industrialshields.com/main/arduino/boards/package_industrialshields_index.json
- Close the preferences window with the “OK” button.
- Click on “Tools” menu, and open the “Boards” submenu, and click the “Boards Manager” option, to open the Boards Manager window.
- Search “industrialshields” to the search filter and select to the list and click “Install”.
- Close the “Boards Manager”. Once it is performed that steps, you are available to select each PLC that you wish to work on “Tools” -> “Boards” : M-Duino…

Warnings

Unused pins should not be connected. Ignoring the directive may damage the controller.

Before using this product, it is the responsibility of the user to read the product’s User Guide and all accompanying documentation.

Industrial Shields PLCs must be powered between 12Vdc and 24Vdc. If a higher voltage is supplied to the equipment can suffer irreversible damage.

Maintenance must be performed by qualified personnel familiarized with the construction, operation, and hazards involved with the control.

Maintenance should be performed with the control out of operation and disconnected from all sources of power.

The Industrial Shields Family PLCs are Open Type Controllers. It is required that you install the M-Duino PLC in a housing, cabinet, or electric control room. Entry to the housing, cabinet, or electric control room should be limited to authorized personnel.

Inside the housing, cabinet or electric control room, the Industrial Shields PLC must be at a minimum distance from the rest of the components of a minimum of 25 cm, it can be severely damaged.

Failure to follow these installation requirements could result in severe personal injury and/or property damage. Always follow these requirements when installing M-Duino family PLCs.

In case of installation or maintenance of the M-Duino please follow the instructions marked in the Installation and Maintenance section on the User Guide.

Do not disconnect equipment when a flammable or combustible atmosphere is present. Disconnection of equipment when a flammable or combustible atmosphere is present may cause a fire or explosion which could result in death, serious injury and/or property damage.
